

Dear Wang,

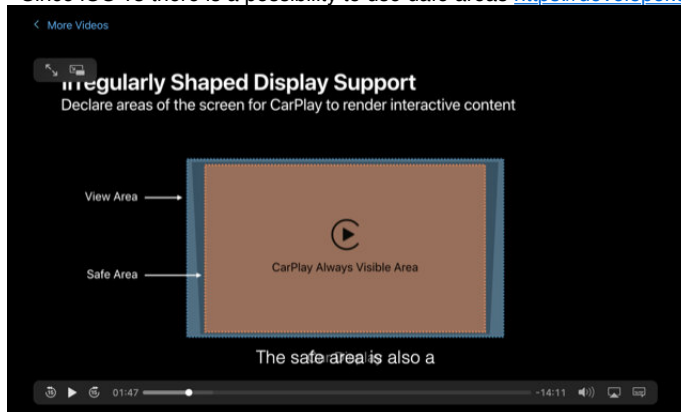

Thank you very much for the support.

I successfully retrofit the box in my Mini and tested it a lot. Everything is working as it suppose to.

However I have some suggestions, how you can make the product even better:

Main problem with the safe Area

- Unfortunately Mini Display corners are rounded, so there is a need to Scan right, left, top and bottom
- Since iOS 13 there is a possibility to use dafe areas <https://developer.apple.com/videos/play/wwdc2019/252/>

- It would be great if you could include this option for MINI displays with **40px-50px** from left and right - I think iOS will shift the controls from this areas but keep the display completely filled.

- for the Andream menu there should be some redesign from my Point of View, as some things are cut

Other suggestions:

- You can add MINI LCI Facelift models (with CIC) R55/R56/R57/R58/R59/R60/R61 (2010 and later) to the fit model list, which is much more, as you have today
 - If I press Voice Button on the steering wheel both, CarPlay and original Mini Voice recognition start - the signal from button shouldn't be forwarded to Mini Navigation, if CarPlay is in use
 - The CarPlay Name of the device is LuChi and should be changed to CIC CarPlay for example
 - The icon to get to setting is a BMW one and should be changeable to one for Mini for example or be generic, as aftermarket navigation use (like Car Settings)
 - There are two possible solutions to connect audio: AUX or Bluetooth
 - - AUX works but if I mute the complete system instead of stop the music (as it is with bluetooth) the streaming continues
 - - In CarPlay it is possible to get music streaming and calls via bluetooth, but not the navigation.
- Question: Would it be possible to use following connection: iPhone - Andream Box CarPlay - Car Bluetooth (instead of AUX)?

I also have three questions:

- 1) what is the USB output power in Watt?
- 3) Do you have a box, which fits the 2017 F45 Series 2 Active Tourer without Navigation?

If you need help or a showcase with a mini I can provide to you some pictures and how to :)

Looking forward to your reply.

Best,
Vlad
